

# LinkedIn Profile Audit Report

AI-Powered Professional Profile Analysis

<https://www.linkedin.com/in/anjali-bang-1ba11b256/>

Overall Score / 100

## Strengths

- **\*\*Clear Profile Picture:\*\*** A professional-looking profile picture is present.
- **\*\*Education Section Populated:\*\*** Includes University details with degree and field of study.
- **\*\*Industry-Relevant Activity:\*\*** Anjali is actively engaging with content related to VFX, animation, and the film industry. This shows interest in the field.
- **\*\*Shared her work:\*\*** She shared one of her projects with recognition in the field, this gives visibility to her work

## Areas for Improvement

- **Missing Experience Section:** The lack of an "experience" section is a major weakness. Even internships or volunteer work should be included.
- **Weak Headline:** The current headline ("Student at MAAC") is generic.
- **No Summary/About Section:** Absence of a professional summary significantly hinders the profile's ability to showcase skills, career goals, and personality.
- **Limited Skills Section:** No skills are listed.
- **No Current Company Details:** The ``current_company`` object has ``location: null``, and likely other missing details. This needs to be populated with details of her current role or institution.
- **No Honors & Awards Section:** This section should be populated if there are any awards or achievements in her career.
- **Low Connection Count:** While not inherently bad, 115 connections is relatively low and limits network reach.
- **Generic Banner Image:** The ``banner_image`` is a default image, which doesn't add any personal branding.
- **Liking only:** The activity section is just based on likes. It would be beneficial to comment, share, or create posts to showcase your knowledge and engage.

## Actionable Recommendations

- **Prioritize the Experience Section:**

- Add all relevant work experience, including internships, freelance work, or even personal projects. Quantify achievements whenever possible (e.g., "Composited shots for a series seen by X viewers").

- For each experience, use bullet points to describe responsibilities and accomplishments.

- **Craft a Compelling Summary/About Section:**

- Write a concise and engaging summary (2-3 paragraphs) highlighting your skills, interests, and career aspirations in animation/VFX.

- Tailor the summary to your target audience (e.g., recruiters in the animation industry).

- **Optimize the Headline:**

- Change the headline to something more descriptive, like "Aspiring VFX Compositor | Animation Student | Seeking Internship Opportunities".

- **Populate the Skills Section:**

- Add relevant skills, including software proficiency (e.g., Nuke, After Effects, Maya), artistic skills (e.g., compositing, rotoscoping, animation), and soft skills (e.g., teamwork, communication). Endorsements will add credibility.

- **\*\*Engage More Actively:\*\***

- Go beyond liking posts. Comment on industry articles, share your own work, and participate in relevant groups. This demonstrates engagement and builds your network.

- **\*\*Customize the Banner Image:\*\***

- Replace the default banner image with something visually appealing and relevant to your field. This could be a sample of your work or an image that reflects your artistic style.

- **\*\*Actively Expand Your Network:\*\***

- Connect with classmates, instructors, industry professionals, and recruiters. Personalize connection requests with a brief message explaining why you want to connect.

- **\*\*Fill Company Details:\*\*** Add relevant details about the company, like its name and the location it is in.

- **\*\*Complete honors and awards sections:\*\*** Add relevant award or honor if you achieve in any field.

- **\*\*Seek recommendations:\*\*** Requesting recommendations from professors or supervisors can significantly enhance your profile's credibility.

- **\*\*Proofread everything:\*\*** Ensure that the profile is free of grammatical errors and typos.

- By implementing these recommendations, Anjali can significantly improve her LinkedIn profile, making it a more effective tool for

networking, job searching, and building a professional presence in the animation and VFX industry.
